Comments:

- The system delivers two basebands, 1.3-2.6 GHz and 3.0-6.0 GHz. Currently, it is only possible to record both bands in parallel for pulsar observations (timing and search mode), but not yet for continuum or spectroscopic observations.
- Usable / useful continuum bands are in the lower baseband e.g. 1.405-1.415 GHz (protected band), 1.66-1.67 GHz (protected band), 2.3-2.4 GHz, 2.5-2.6 GHz, 2.69-2.70 GHz (protected band), 2.89-2.92 GHz.
- Usable / useful continuum bands are in the upper baseband e.g. 3.33-3.36 GHz, 4.7-5.0 GHz, 5.3-5.6 GHz.
