

Current Status of the observational system

Last update: see bottom right

Despite the current Corona epidemic, the observatory is still operational, but with a considerably reduced staff. We can currently not foresee when the situation will return to a normal state.

Receivers currently installed at the prime focus:

| Receiver | Status |
|----------|--------|
| P210-7 | ok |
| P200 | ok |

Receivers currently available in the secondary focus:

| Receiver | Status |
|----------|------------------------------------|
| S130 | ok |
| S110 | ok, but beware of RFI |
| S60 | ok, only one horn available |
| S45 | ok |
| S36 | ok |
| S28 | ok |
| S20 | ok |
| S14 | ok |
| S9 | please contact staff |
| S7 | ok, one channel in off-horn broken |

The S-band has recently heavily been occupied by RFI (due to LTE). Observations with the 11cm-receiver should use the 8-bank polarimeter.
