

Current Status of the observational system

Last update: see bottom right

Receivers currently installed at the prime focus:

Receiver	Status
P210-7	ok
P200/180	ok
P170 / UBB	currently under maintenance

Please note, that there is new strong RFI at ~1475 MHz, influencing also the protected band. The staff of the observatory is currently investigating possible measures.

Receivers currently available in the secondary focus:

Receiver	Status
S130	not available
S110	ok, wider bandwidth with the new EDD system - please contact staff
S60	ok, only one horn available
S45	ok
S36	not available
S28	ok
S20	ok
S14	ok
S7	ok

The S-band has recently heavily been occupied by RFI (due to LTE). Observations with the 11cm-receiver should use the 8-bank polarimeter or the new spectro-polarimeter (please contact staff).

For *questions about the scheduling* please contact **sched100m@mpifr-bonn.mpg.de**.

For *other questions* or comments, please contact **eff-support@mpifr-bonn.mpg.de**.

Please also report RFI to the same email address.
