

Remote observing at Effelsberg

Remote observing on the 100-meter telescope is possible via VNC.

This is possible from within the MPIfR-LAN as well as from outside via an ssh-tunnel.

If you want to do remote observations for the first time, please contact Heiko Hafok (hafok_at_mpifr.de) or Alex Kraus (akraus_at_mpifr.de) well in advance of your observations.

People from abroad without an account at the MPIfR, might get a guest account (for a limited time) on request.

For running remote observations, you should have some observing experience at the 100-m-telescope!

All necessary details can be found here: [Remote Observing \(restricted access\)](#)
