

Current Status of the observational system

Last update: 17. Feb. 2017 - AK

All secondary focus receivers are up and running; the 7mm system has only one polarization working (RCP).

Prime focus receivers currently available: P210-7, P200, P10, P170 (will be removed soon).

Please note, that the S45 receiver (aka C+-band) is still under commissioning. If you want to use it, please let us know beforehand.

Outlook:

A major repair of the telescope track will take place between April 4 - May 12. During that time, operations will be significantly restricted.

During Jul 5 - Sep 1, our usual summer works will be done (telescope painting / corrosion protection). In this time, the time between 0800-1900 hours on Mo-Fr will be unavailable for observations.

For questions or comments, please contact **eff-support[at]mpifr-bonn.mpg.de**.
