

# Presentations given during the Single Summer School 2010

|                            |                                                                      |
|----------------------------|----------------------------------------------------------------------|
| M. Kramer                  | <a href="#">Fundamentals of Radio Astronomie I</a>                   |
| J. Kerp                    | <a href="#">Fundamentals of Radio Astronomie II</a>                  |
| R. Davis                   | <a href="#">Analogues Signal Processing</a>                          |
| A. Possenti                | <a href="#">Why Single Dishes?</a>                                   |
| U. Bach                    | <a href="#">Calibration Techniques</a>                               |
| W. Reich                   | <a href="#">Sky Mapping</a>                                          |
| R. Beck                    | <a href="#">Continuum Observations</a>                               |
| R. Beck                    | <a href="#">Polarimetry</a>                                          |
| D. Muders                  | <a href="#">Spectral Line Observing</a>                              |
| M. Wienen                  | <a href="#">Reduction and Analysis Techniques for Spectral Lines</a> |
| H.-R. Klöckner             | <a href="#">HI Observations</a>                                      |
| B. Winkel                  | <a href="#">Data Analysis</a>                                        |
| J. Verbiest & K. Lazaridis | <a href="#">Pulsar Timing in Practice</a>                            |
| A. Jessner                 | <a href="#">Dealing with RFI</a>                                     |
